Mini-audio adapter
with Bluetooth® wireless technology

Unravel your music: turn wired audio into wireless...instantly!

Do not discard your existing speaker system, turn it into an advanced wireless streamer instead. The Audio Adapter with Bluetooth® technology from Klip Xtreme allows the streaming of audio directly to your conventional audio system using a wireless connection. This innovative music receiver instantly adds Bluetooth streaming capabilities to any audio device with auxiliary input, such as PC speakers, standalone stereo systems or A/V receivers. With an effective wireless range of up to 10 meters, this adapter offers the best Bluetooth solution for playing music from any smartphone, tablet or Bluetooth-enabled device through your home stereo system, without the constraints of wires or outdated technology

Specifications:
